RETHINKING
POSSIBILITIES
RESHAPING
LIVES

At OsteoMed, we work alongside surgeons who devote their lives to improving those of others. Our goal: rethinking the possibilities that have the power to reshape lives.

With a spirit of innovation and a relentless focus on quality, we offer surgeons a wide range of choices for neurosurgical and craniomaxillofacial procedures.

PROFILE

LOW PROFILE NEURO PLATING SYSTEM

Rethinking Possibilities, Reshaping Lives

Lowest Profile

Neurosurgical Plating System

Profile Zero is an innovative addition to the OsteoMed Neurosurgical plating product offering. At .25mm plate profile, the system virtually eliminates patient palpability. The uniquely engineered plate and screw construct offers strength for cranial fixation with the lowest profile on the market. With a variety of plate designs, Profile Zero provides the neurosurgeon with many options in the OR. Additionally, the updated tray design reduces the system's "footprint" in the surgical theater. Coupled with the plates and screws is a new ergonomic screwdriver handle which is functional and aesthetically appealing.

-
- .25mm plate-to-screw profile
 - Beveled plate edges for reduced palpability
 - Plates easily contourable to patient anatomy
 - Customizable VisiDisk
 - Reduced OR footprint
