

PUREBONE®

Demineralized Cancellous

ALLOGRAFT

PUREBONE

PureBone Demineralized Cancellous products are made from 100% human trabecular bone with compressible, elastic, sponge-like attributes. PureBone provides a natural scaffold for cellular ingrowth, revascularization and the ability to soak up biologic fluids. Our proprietary process revolutionizes the handling properties of bone and maintains its natural growth factors.

Versatile

PureBone Demineralized Cancellous Tissue is provided in three forms:

- Demineralized Cancellous Filler
- Demineralized Cancellous Block
- Demineralized Cancellous Strip

PureBone Characteristics

- 100% human demineralized cancellous bone
- Interconnected porosity
- Compressible handling characteristics
- Storage at room temperature
- Conveniently packaged
