

# EXTRACTOR™

## Bone Marrow Aspiration Needle

ACCESSORIES

EXTRACTOR

The Extractor High Performance Bone Marrow Aspirator is engineered to be the surgeon's first choice for procedures requiring bone marrow harvesting. The longer, six-ported cannula is designed for more flexible positioning and enhanced marrow extraction. The ergonomically designed "Twist Lock" handle combines with a "Double Diamond" stylet point for greater ease of use and enhanced patient comfort.

### Ideal for all Patients

- Designed for all body types
- 6 inch ported cannula keeps handle above instrumentation
- Designed for improved patient comfort

### Innovative Design

- Large side ports enhance bone marrow harvesting
- The "Twin Peaks" cannula tip provides superior cutting ability
- Large 11 gauge cannula

### Easy to Use

- Ergonomically designed handle allows the clinician to apply consistent pressure for greater comfort without excessive hand fatigue
- A luer lock connection enables easy and secure syringe attachment

### Disposable

- Single-use patient device
- Conveniently packaged in a sterile pouch
- Provided with a protective sleeve for safe disposal
