

MICROfuse Syringe Infusers: a better way to infuse

Improved Patient Care

- Less unneeded fluid entering patient
- Microbore tube sets allow more meds to reach your patient
- Uniform delivery reduces phlebitis rates
- Consistent flow rates within +/- 3%*

Cost Effective

- Requires less nursing intervention compared to other methods
- Designed for the use of generic syringes & microbore tube sets
- Minimal drug waste & the ability to use bulk drugs
- Initial set-up cost is much lower

6400-IFU-0011 Rev C

Easy to Use

- Battery powered & lightweight for portability
- Simple push button controls, no programming required
- One handed syringe loading
- No preventative maintenance required

*excluding syringe variations
