

Our Clean Up Biohazard Spill Kit has been vetted, approved, and under contract for distribution throughout HealthTrust Purchasing Group (HPG) members.

Description: Expanded absorbing perlite mineral with accelerated water and oil absorption. Each mineral is *heavily dosed* with a non-toxic wetting agent to capture odors and shear hydrocarbon molecules.

Primary Use: An Emergency Response Tool for effective removal of *significant biohazard* incidents (i.e. bodily fluids). Clean Up will uniquely encapsulate odors and can also be used for chemo and common spills. *The Clean Up kit is designed to be used as an easily accessible new protocol for all employees.*

Differentiators:

- Single dose package design offers quick and effective response to large incidents
- Absorbs liquids, moist solids, and oils
- Once applied the contaminate along with shard glass becomes easily swept
- Applied and removed with little to no airborne dusting (product feels moist)
- Odor is encapsulated without the use of noxious perfumes
- Kit includes basics tools for large biohazard removal so caregivers can readily respond to volatile situations thus establishing a protocol that can be utilized within the entire healthcare community.

Value Proposition:

- Response time to *biohazard incidents* is significantly reduced; saving labor and reducing liability for cross contamination
- Slip and fall incidences are reduced to enhance risk management programs
- Easy access and simple instructions for use of Clean Up encourages cross- training among employees
- Immediate response avoids annoyance and relieves embarrassing situations
- Caregivers have a tool at their disposal to protect themselves and their patients
- OSHA Compliant Spill Kits
