

INTRODUCING A REVOLUTION IN SURGICAL GLOVE TECHNOLOGY

New **GAMMEX[®] Non-Latex PI Micro White** is an ultra-thin glove made from synthetic polyisoprene which offers an optimal level of sensitivity, comfort, and protection against natural rubber latex allergies. Ideal for delicate procedures in ophthalmic, micro, and cardiovascular.

Safety & Protection

Infection Control

Viral Penetration. **GAMMEX[®] Non-Latex PI Micro White** has been tested and passed the viral penetration according to ASTM F1671 and F1670.

Cuff Roll-Down. Features our SureFit Technology™. SureFit Technology™ provides surgeons, nurses and other healthcare professionals with superior protection during operating room procedures.

Bone-Cement. As long as the preparation and use directions on the bone-cement are followed, this glove provides a protective barrier for handling mixed bone-cement product.

Skin Protection

Not made with natural rubber latex. Made of 100% synthetic polyisoprene and is safe for latex-sensitive (Type I) healthcare professionals and patients.

Comfort & Fit

Donning

Alcohol Resistant. The proprietary polyurethane inner coating will not break down during normal use. It is resistant to alcohol-based hand disinfectants.

Damp-Hand Donnability. Enhanced polymer coating allows for easy dry and damp-hand donning.

Double Donnability. Design and thickness allow for easy and comfortable double-gloving.

Hand Fatigue

Shape of Glove/Former. Produced on new, ergonomically-designed formers to enhance fit and comfort, and to reduce hand fatigue and stress.

Stretchability (Modulus). Because this glove is made from non-latex polyisoprene, wearers experience a more secure fit that also provides tactile sensitivity and dependability.

GAMMEX[®] Non-Latex PI Micro White delivers all the performance characteristics of natural rubber latex without the risk of latex sensitivity.
