

## INTRODUCING A REVOLUTION IN SURGICAL GLOVE TECHNOLOGY

The **GAMMEX® Non-Latex PI** surgical glove is made from synthetic polyisoprene. The glove delivers all the performance characteristics of natural rubber latex without the risk of natural rubber latex sensitization. The **GAMMEX® Non-Latex PI** is light green in color for instant identification as a natural rubber latex-free glove, which helps to reduce confusion and risk to both healthcare workers and patients with sensitive skin.

### Safety & Protection

#### Infection Control

**Viral Penetration.** **GAMMEX® Non-Latex PI** has been tested and passed the viral penetration according to ASTM F1671 and F1670.

**Cuff Roll-Down.** This glove features Ansell's SureFit Technology™ that provides surgeons, nurses, and other healthcare professionals with superior protection during operating room procedures.

**Bone-Cement.** As long as the standard preparation and use directions for bone-cement are followed, this glove provides a protective barrier for handling mixed bone-cement product.

#### Skin Protection

Not made from natural rubber latex. Made of 100% synthetic polyisoprene and is safe for latex-sensitive (Type I) healthcare professionals and patients.

### Comfort & Fit

#### Donning

**Alcohol Resistant.** Ansell's proprietary polyurethane inner coating will not break down. It is resistant to alcohol-based hand disinfectants.

**Damp-Hand Donnability.** Enhanced polymer coating allows easy dry and damp-hand donning.

**Double Donnability.** Design and thickness allow for easy and comfortable double-gloving.

#### Hand Fatigue

**Shape of Glove/Former.** Produced on new, ergonomically-designed formers to enhance fit and comfort, and to reduce hand fatigue and stress.

**Stretchability (Modulus).** Because this glove is made from non-latex polyisoprene, wearers experience a more secure fit that also provides tactile sensitivity and dependability. **GAMMEX® Non-Latex PI** delivers all the performance characteristics of natural rubber latex without the risk of latex sensitivity.

#### Grip

**Application Driven.** Anti-slip smooth finish prevents slippage.
