Everything you touch...we touch.

At Ansell Healthcare, we understand, anticipate and respond to what you need in examination gloves. After all...gloves are your link and point of contact with your patients.

You asked for gloves that not only provide added protection, but also suit a variety of needs. We responded with a full line of premium examination gloves that enable you to perform an unlimited scope of procedures. Each glove is designed to meet your needs and all of our gloves offer comfort and reliable barrier protection. Whether you need powder-free latex, latex-free or something in between, we have the right examination gloves for you!

Ansell's Commitment to Innovation

Ansell examination gloves are manufactured with the highest level of quality available. And because we pledge to bring you, our customer, products with the latest innovations in the gloving market, you can always look to Ansell for the right product to fit your needs. Some of our latest innovations include:

Allergy Protection

Ansell's newest exam glove, Micro-Touch® NitraFree™, is manufactured without latex and sulfur-based chemical accelerators, helping to protect against Type I (latex) allergies and Type IV (chemical) allergies. Visit AnsellProtects.com for more information on allergy solutions.

Handfriendly Technology

Our handfriendly technology is available on the Micro-Touch® NextStep®. This latex glove offers a glycerol coating which hydrates, moisturizes and nourishes the skin.

Low-Protein Technology

Ansell utilizes advanced technology to reduce total water-based extractable protein thereby greatly reducing residual protein levels on latex gloves.

Chemotherapy Approved

Several of our exam gloves have been tested and are FDA approved for handling chemotherapy drugs.¹

Innovative Packaging

Ansell's newly designed exam glove pack is a reflection of our commitment to environmental sustainability. This innovative packaging features more exam gloves per box and per case in order to decrease packaging waste, increase storage space at your facility and reduce re-stocking orders to save on fuel consumption and shipping costs. Plus, the newly designed box will continue to fit into your existing wall brackets.

Look for our eco-friendly packaging logo to identify these products.

200 Pieces
Per Box

¹ Specific chemical resistance data available upon request: 1-800-952-9916 (U.S.A. only). Gloves used for protection against chemotherapy drugs must be selected specifically for the type of chemicals used. Review material safety data sheets for the chemicals being used to determine the required level of protection.

Ansell's Value Proposition

We are committed to protecting you and your patients with the highest quality examination gloves. Here's how we do it.

Our Products

Our full line of premium examination gloves offers a wide variety of products to match the demanding requirements of the healthcare industry.

- Ansell has a rich heritage in product innovation, with over a century of industry milestones and manufacturing breakthroughs to our credit.
- Product concepts and performance are validated by internal laboratory testing. New product ideas are put through a rigorous Stage Gate® process to ensure that products function at expected performance levels. Healthcare professionals, in the appropriate healthcare environments, conduct final product evaluations and validations to ensure that our products stand up in real-life situations.
- Ansell is one of the first glove manufacturers to adopt a Six Sigma approach to operational excellence ensuring across-the-board efficiencies and quality.
- Ansell has implemented World Class Manufacturing (WCM) as a holistic initiative toward operational excellence.
- All of Ansell's examination gloves meet or exceed ASTM examination glove standards.

Our Service

We don't just sell products; we provide solutions to your specific needs.

- Our highly trained staff of sales representatives, clinical consultants and customer service department are without equal in the industry.
- Ansell addresses your needs with practical and actionable solutions.
- We offer a full range of educational programs designed to keep your staff up-to-date on the latest glove technology, trends and healthcare issues. Available offline or online, we are continuously providing new programs.
- Our one-of-a-kind 10-Step Glove Evaluation Process is the most thorough and comprehensive in the industry.
- We strive to always have the right product in your hands at the right time.

Our Value

Some customers require creative solutions to short cycle replenishment. Ansell partners with its network of distributors to ensure efficient distribution.

- Our Glove Management Program helps you streamline your inventory while eliminating misuse and redundancy.
- At Ansell, quality and value go hand in hand – we will work with you to maximize your facility's financial goals.
- We can negotiate flexible corporate agreements to suit the complexities of different provider organizations.
- Ansell teams up with you to provide customized logistical solutions, ensuring that your facility's individual requests are addressed timely and efficiently.
- We offer long-term Group Purchasing Organization (GPO) relationships. We understand your special purchasing needs and provide value-added solutions.

Micro-Touch® NitraFree™ Pink Nitrile, Powder-Free Examination Gloves

Micro-Touch® NitraFree™ pink nitrile examination gloves are manufactured without sulfur-based chemical accelerators,* helping to protect you from Type I (latex) and Type IV (chemical) allergies. Its premium nitrile material is soft with more stretch for greater comfort, fit and excellent protection in all risk settings. Proceeds from the purchase of every case go to Susan G. Komen for the Cure® in support of breast cancer research and outreach.†

- Material: 100% nitrile; no natural rubber latex or sulfur-based chemical accelerators*
- Color: Pink
- Textured fingertip finish
- Inverted, 9.5" beaded cuff
- FDA approved for handling chemotherapy drugs^{1**}
- Ambidextrous
- Nonsterile
- Single use

*Does not contain any sulfur-based accelerators such as thiurams, carbamates, thiazoles, guanidine or thioureas.

†Through March 31, 2013, Ansell will donate \$2 per case sold of the Micro-Touch® NitraFree™ to Susan G. Komen for the Cure®, with a minimum guaranteed donation of \$25,000.

**Tested for use with the following 9 chemotherapy drugs: Vincristine Sulfate, Cyclophosphamide, Doxorubicin Hydrochloride, 5-Fluorouracil, Methotrexate, Etoposide, Paclitaxel, ThioTEPA and Carmustine.²

2. Caution: Testing showed an average breakthrough time of 45.3 minutes with Carmustine.

Micro-Touch® Elite®

Polyvinyl Chloride, Powder-Free Examination Gloves

Micro-Touch® Elite® powder-free, stretch vinyl examination gloves are produced with a polyvinyl chloride formulation that provides a more comfortable fit than traditional vinyl gloves. They are an excellent alternative for latex-sensitive individuals for use in low-risk clinical applications that do not involve blood-borne pathogens or bodily fluids. This glove is not formulated with DEHP.

- Material: Stretch polyvinyl chloride (PVC)
- Color: Cream
- Smooth finish
- Inverted, 9.5" beaded cuff
- Ambidextrous
- Nonsterile
- Single use

Review material safety data sheets for the chemicals being used to determine the required level of protection.

Micro-Touch® Plus Sterile Singles

Sterile Latex, Powder-Free Examination Gloves

Micro-Touch® Plus Sterile powder-free, textured, natural rubber latex examination gloves feature a polymer coating to aid in donning and provide excellent tactile sensitivity, durability and grip that healthcare professionals can expect in both wet and dry procedures. This sterilized natural rubber latex exam glove is recommended for sterile exam (non-surgical) procedures. Advanced manufacturing processes reduce total water extractable protein to 50 µg or less per gram.

- Material: Natural rubber latex
- Color: Cream
- Fully textured finish
- Inverted, 9.5" beaded cuff
- Ambidextrous
- Sterile (for nonsurgical procedures)
- Single use
