Pro Tector®

Infectious Waste Bags

Description:

Red infectious waste bags constructed of polyethylene.

Intended Use:

Pro Tector Infectious Waste Bags are designed specifically for the safe collection, handling and disposal of non-sharp infectious waste.

Product Specifications:

Material:	Manufactured from high grade polyethylene at 1.3 mil thickness, meeting test standards for tear resistance and impact resistance.
Packaging and Dimensions:	Small - 10 Gallon - 24" x 23" - 100/box. Medium - 12 Gallon - 24" x 30" - 100/box. Large - 25 Gallon - 30" x 43" - 50/box.

Product Capabilities:

Manufactured to meet the ASTM D1709 test standard for impact resistance at 165 grams; and the ASTM D1922 test standard for tearing resistance of 480 grams, satisfying all state regulations for infectious waste bags.

Heat welded seams provide strength to withstand collection, transport and disposal requirements.

Pro Tector Infectious Waste Bags are imprinted with text and symbols that meet state and federal requirements. "INFECTIOUS WASTE" is printed in English and Spanish along with the universal biohazard symbol. Lines are provided as a reminder in areas where generators must record their name and address.

Use Precautions:

Do not use this product as the primary container for SHARPS disposal.
