

WELCH ALLYN

FlexiPort[®] Blood Pressure Cuffs

THE TRUE STANDARD IN BLOOD PRESSURE CUFF STANDARDIZATION.

WelchAllyn[®]

Advancing Frontline Care[™]

Why choose FlexiPort®?

The true standard in blood pressure cuff standardization.

When it comes to standardizing blood pressure cuffs, Welch Allyn FlexiPort blood pressure cuffs can help hospitals **improve financial outcomes** and **enhance patient safety** with options that help streamline workflow and inventory management, and reduce the risk of cross-contamination.

The secret to true cuff standardization is the single-point FlexiPort connection, a practical innovation that enables virtually any device to work with Welch Allyn FlexiPort blood pressure cuffs—without the hassle of traditional cuff tubes and connectors.

How can FlexiPort help you?

Clinicians

Enhance Patient Safety

By allowing cuffs to be used with virtually any device, FlexiPort makes it easier to find the proper-sized cuff for your patient and help prevent miscuffing.

Purchasing

Improve the Bottom Line

FlexiPort standardization can help reduce excess inventory costs by up to \$140k, lowering cuff inventory levels as much as 90%.*

Biomedical Engineers

Increase Staff Satisfaction

The single-point FlexiPort connection can improve nursing workflows, delivering a more reliable connection system and fewer complaints from hospital staff.

Infection Control

Reduce Risk

FlexiPort technology offers hospitals options that facilitate single-patient-use to help reduce the risk of cross-contamination.

*Savings based on actual standardization at Grady Health System, Atlanta, GA.

The most comprehensive cuff options to match your needs.

WELCH ALLYN

FlexiPort® EcoCuff™

SINGLE-PATIENT-USE BLOOD PRESSURE CUFFS

One cuff. One patient. One true solution for reducing costs, cross-contamination and environmental impact.

Traditional single-patient-use cuff solutions can be expensive, wasteful, and difficult to implement. The innovative EcoCuff™ design helps hospitals reduce the risk of cross-contamination with technology that makes it simple to implement a single-patient-use cuff model, while at the same time helping to control costs and the hospital's environmental impact.

Improve Financial Outcomes

- Durable enough to last for a complete patient stay, yet **more cost-effective than most traditional disposable cuffs** when used in a single-patient-use setting

Enhance Patient Safety

- Unique slot fitting system **helps prevent miscuffing**, which can lead to reading errors of up to 30 mmHg*
- Meets all the latest clinical guidelines for proper fit from AAMI and AHA

Designed with practitioners and the planet in mind.

Welch Allyn FlexiPort EcoCuff: Approximately 60% Less Environmental Impact

Reduced Weight & Packaging

- EcoCuff weighs 60% less than traditional disposable cuffs
- Lighter size and smaller material volume help reduce hospital waste

Innovative Material Design

- Constructed of 100% polypropylene
- Does not contain BPA, DEHP or PVC

More Disposal Options

- Capable of being recycled***

60% less environmental impact than traditional blood pressure cuffs**

* O'Brien, E. Measurement of Blood Pressure. Beevers, Lip, O'Brien: The ABCs of Hypertension. Blackwell Publishing, 2007.

** Source: Based on an independent life cycle analysis conducted by The Center of Sustainable Production at Rochester Institute of Technology comparing EcoCuff to traditional FlexiPort disposable blood pressure cuffs and traditional Trimline cuffs when used in a one-cuff-per-patient-use model.

*** EcoCuff is made with 100% polypropylene material. Although the practice is not yet widespread, a number of hospitals have already implemented the practice of recycling medical-use polypropylene plastics.

WELCH ALLYN

FlexiPort® Disposable

BLOOD PRESSURE CUFFS

True standardization meets reduced cross-contamination.

A reliable disposable cuff solution, FlexiPort Disposable Blood Pressure Cuffs deliver value to hospitals by combining the benefits of FlexiPort technology with reduced risk of cross-contamination that comes with implementing a single-patient-use model.

Improve Financial Outcomes

- Affordable enough for single-patient-use to **reduce cross-contamination risks**
- Durable enough for extended patient stays

Enhance Patient Safety

- Complete range of color-coded sizes for **fast, accurate selection of the correct cuff size**
- Meets all of the latest clinical guidelines for proper fit from AAMI and AHA
- Contains no DEHP or BPA

Manage Change

- **Reduce part numbers by up to 90%** with standardization to FlexiPort, making it easier to manage inventory*

*Based on case study of system-wide standardization at Grady Health System, Atlanta, GA

CASE STUDY: Oklahoma Heart Hospital

Situation:

Converted from traditional-style cuffs and standardized with FlexiPort Disposable Cuffs across two campuses.

Results:

By switching to FlexiPort and enabling one cuff to stay with the patient for their entire stay, Oklahoma Heart Hospital recognizes a \$40,000/year savings.

Testimonial:

"We've been very pleased with our conversion to the Welch Allyn (FlexiPort) Disposable Blood Pressure Cuffs. They are faster to inflate and easier to connect with fewer leakage problems than our previous cuffs."

- Matt Fay, Materials Manager,
Oklahoma Heart Hospital

WELCH ALLYN

FlexiPort® Reusable

BLOOD PRESSURE CUFFS

True standardization—time after time.

Affordable and easy to use, Welch Allyn FlexiPort Reusable Blood Pressure Cuffs offer all the advantages of FlexiPort technology—including simplified connectivity—in a dependable, durable design.

Improve Financial Outcomes

- Tested to **withstand demanding clinical environments**
- Three-year warranty

Simplify Workflow

- Rotatable port reduces stress to cuff tubing and port, **improving patient comfort and cuff durability**

Simplify and Save with Standardization

FlexiPort®: The Only True Standardization Solution

Other current cuff standardization methods typically involve a confusing array of cuff configurations, Y-tubes, clamps, and connectors. This translates into large inventory levels, confusion for the caregiver, and potential device performance issues due to incorrect or leaky connections.

With FlexiPort, Welch Allyn offers a true cuff standardization solution for your facility, allowing you to use one cuff on most electronic and manual blood pressure devices. FlexiPort cuffs not only streamline workflows by making it easier for caregivers to find and change the right cuff, but also reduce part numbers by up to 90 percent, simplifying inventory and ordering.

Why Standardize with FlexiPort?

- Streamline SKUs and inventory
- Improve consistency across your facility
- Helps clinicians simplify workflows
- More cuff options than other providers
- Options that help reduce environmental impact

Truly standardize your facility with these **three easy steps:**

- 1) Standardize
- 2) Choose Size
- 3) Select Style

Contact your Welch Allyn sales representative for more information on standardizing your cuffs with Welch Allyn.
