# Spine Surgery Patient Positioning Tailored To Your Needs

## Service You Can Count On

### A Company You Can Trust... *See page 4*

Let us take care of your Allen® Advance Table with our nationwide network of service centers. As a company, we understand that our role is to provide services and equipment that are flexible enough to meet the needs of your patients, while assisting you in controlling and reducing cost.

## Premium Spine Solutions

### Allen® Advance Table *See page 8*

Allen's premium solution for complex spine surgical procedures. Designed with a new safety feature to ensure that if the pin that connects the "H-Bracket" to the table base is accidentally pulled out, the patient support top will not fall to the floor. In addition, this solution offers a modern and intuitive user interface with convenience features such as central locking casters – all at a desirable cost.

## Adaptive Spine Solutions

### Allen Spine System *See page 18*

An innovative OR table extension that turns your OR table into a table capable of positioning patients for complex spine surgical procedures at a fraction of the price of a stand-alone spine table. It also offers the added advantage of saving space, storing in less than 6 sq ft (.5 sq m).

## Table Attachments

*See page 27*

Allen offers innovative table attachments for spine surgery that are compatible with standard OR tables, Allen Advance Table, Allen Flex Frame, or Mizuho OSI Modular Table System\*.

\*Compatible with rails that are 1.25" (3.2 cm) wide x 1.5" (3.8 cm) tall with a 14.5" (36.8 cm) space between.

Service  
You Can Count On...

# A Company You Can Trust

## Let Us Take Care Of Your Allen® Advance Table With Our Nationwide Network Of Service Centers

As a company, we understand that our role is to provide services and equipment that are flexible enough to meet the needs of your patients, while assisting you in controlling and reducing cost.

- ✓ On-site repairs
- ✓ Over 140 service centers nationwide
- ✓ Over 1,000 certified technicians
- ✓ Technical support line dedicated to Allen Advance Table
- ✓ Detailed service manual sent with every table
- ✓ Immediate response
- ✓ 1,000,000+ product deliveries and removals performed annually

On-site service/repair is only available for the Allen® Advance Table.  
Advance Table service is available in US only.

# Care Continuum Services

## Delivery Assist

Once your Advance Table arrives at your facility a trained and certified technician will set up your table to be ready for use at no cost to you.

## Immediate Response

With over 140 repair centers nationwide, a service technician is never too far away.

## On-site Repairs

All of our Advance Table repairs are conducted at your facility by one of our trained and certified repair technicians.

On-site service/repair is only available for the Allen® Advance Table.  
Advance Table service is available in US only.

Upon realizing that we had a problem moving our Allen Advance Table we contacted our local Allen Sales Rep. He noticed that the table wouldn't roll due to a broken or stuck caster. He was unable to move the table as well so he immediately called Allen Medical. Allen in turn contacted Hill-Rom Service to set up a service call. A Hill-Rom Service Tech was on-site in a day and repaired what happened to be a broken caster. We were very pleased with the service provided by our Sales Rep, Allen Medical and Hill-Rom Service.

Premium  
Spine Solutions

# Allen® Advance Table CE

## A Premium Solution For Complex Spine Surgical Procedures Designed With Improved Safety Features

The Allen Advance Table is designed with a new safety feature to ensure that if the pin that connects the “H-Bracket” to the table base is accidentally pulled out, the patient support top will not fall to the floor. In addition, this solution offers a modern and intuitive user interface with convenience features such as central locking casters — all at a desirable cost.

- Modern user interface helps the user understand the “state” that the table is currently in e.g. locked, unlocked, tilted, trend or reverse trend
- Central locking casters controlled directly from the pendant
- EZ-Roll casters help the caregiver when transporting the table around the OR
- Numbered H-Brackets help with communication between caregivers when attaching the different tops to the base
- 180° rotation capabilities
- Patient weight capacity: 600 lbs (272 kg)

- Innovative “H-Bracket” design ensures that if the pin connecting the H-Bracket to the table base is accidentally pulled, the patient support top will not fall to the floor

## Prone Positioning

The Allen® Advance Prone Positioning system is constructed using two carbon fiber rails. It offers an open frame design to allow the abdomen to hang in an unobstructed manner. In addition, the system has an innovative chest pad that is crescent shaped to help accommodate the female chest anatomy while also helping to avoid impingement of the brachial plexus. Also included are two 12" flat plates, a sling, and several choices of arm supports.

## Intuitive User Interface

Clear, concise display helps the user understand the “state” that the table is currently in e.g. locked, unlocked, tilted, trend, or reverse trend.

- Central locking casters controlled directly from the pendant
- EZ-Roll Casters help the caregiver when transporting the table around the OR
- Numbered H-Brackets help with communication between caregivers when attaching the different tops to the base

## Supine Positioning

The Allen® Advance Flat Top is a fully radiolucent carbon fiber imaging platform that can be used in a variety of procedures. It comes with the Allen Advance Flat Top Pad which is designed around the popular Astrus Elite™ pressure management surface.

- The Advance Rail Top (A-71400), the Advance Flat Top (A-71410), and the associated pad sets are fully radiolucent
- Unobstructed C-Arm and O-Arm access

# 180° Rotation: Simplified Procedure

## 1 Patient in supine position

## 2 Attach H-Brackets, prone support top, and safety straps

### 3 Pull handle down and “flip” patient from supine to prone

Modern user interface clearly displays when the table is in manual “flip” mode

# 180° Rotation: Improved Safety

## 4 Remove flat top, H-Bracket and pin

Innovative H-Bracket design ensures that if the pin connecting the H-Bracket to the table base is accidentally pulled, the patient support top will not fall to the floor

# Advance Table Package #A-71001

The Advance Table Standard Package includes everything you need for standard prone and supine spine surgical positioning. The package also includes a convenient rolling accessory cart so you can store your tops, rails, supports, etc. all in one place. If you wish to upgrade your table for special positioning needs, we offer a Premium and a Complete Package with additional accessories included. *See page 17*

# Advance Prone Support Set #A-71300

*Included With All Advance Table Packages*

The Advance Table Prone Support Set is a comprehensive patient support system for the prone position. Although it was developed with the Allen Advance Table, this prone support system is also compatible with the Allen Flex Frame and the Mizuho OSI Modular Table System\*. The hip pads have been developed in several sizes to help accommodate different patient shapes and sizes. In addition, the chest, hip and thigh support pads are constructed using a patented multi-layer foam construction similar to that of the popular Allen Wingsets, which is designed to aid in reducing sheer pressures on the skin.

# Advance Premium Package Upgrade

#A-71002

#A-70700  
C-Flex Head Positioning System  
1 Included

Upgrade your Advance Table to the Premium Package with the addition of the C-Flex® Head Positioning System.

The C-Flex Head Positioning System can be used in all types of spine surgery including posterior cervical surgery that utilizes skull clamps with pins. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs, and lateral procedures.

*See page 33 for more information on the C-Flex Head Positioning System*

# Advance Complete Package Upgrade

#A-71003

#A-70700  
C-Flex Head Positioning System  
1 Included

Upgrade your Advance Table to the Complete Package with the addition of both the C-Flex Head Positioning System and the Allen® Bow® Frame.

The C-Flex Head Positioning System can be used in all types of spine surgery including posterior cervical surgery that utilizes skull clamps with pins. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs, and lateral procedures.

*See page 33 for more information on the C-Flex Head Positioning System*

#A-70800  
Allen Bow Frame  
1 Included

The Bow Frame’s shape creates the desired reverse lordosis needed to open the intervertebral spaces. The Bow Frame enables the patient’s abdomen to hang free during procedures. It is also radiolucent and allows for unrestricted C-arm access. The removable crank is used to adjust the amount of flex and tension in the patient supports.

*See page 29 for more information on the Allen Bow Frame*

Adaptive  
Spine Solutions

# Allen® Spine System

## An Innovative Table Extension That Turns Your Existing Standard OR Table Into A Spine Table For Complex Spine Surgical Procedures

The Allen Spine System is an extension for your OR table that enables you to perform spine surgery with the positioning benefits of a stand alone spine table such as the Allen Advance Table. In addition it offers intraoperative lumbar flex and a small storage footprint. The advanced accessories adjust to fit the individual patient's anatomy.

- Intraoperative Flex: Use the power of the table to flex and reposition the patient
- Radiolucent Extension 48" x 17" (1220 mm x 430 mm): Provides excellent C-Arm and O-Arm access
- Optimized Pressure Management: Chest, hip, and head supports
- Versatile: Prone, lateral, and supine positioning
- Range of Motion: Provides 20° lateral tilt, trend, and flex powered by the OR table
- Height: 25" to 38" (635 mm - 965 mm)
- Fits OR tables with outside rail width 20" - 24" (510 mm - 610 mm)
- Lateral Package available *See page 26*
- Patient Weight Capacity: 500 lbs (227 kg)
- Saves Space: Stores in less than 6 sq ft (.5 sq m) and accessories can be stored on the frame

# Spine System Packages

The Allen® Spine System includes everything below. You also have the choice of an appropriate head positioner based on your surgical needs:

- Choose the C-Flex® Head Positioning System Package #A-70002 if you require an advanced head positioner with simple “squeeze and position” technology that can be used to position the head for all types of spine surgery, including posterior cervical surgeries that require skull clamps and pins.
- Choose the C-Prone Head Positioner Package #A-70000 if you require a standard head positioner that helps position the head quickly and simply for lumbar surgery only.

# Allen® Bow® Frame #A-70800

Versatile - Compatible With Standard OR Tables, Allen Advance Table, Allen Flex Frame, Or Mizuho OSI Modular Table System

The Allen Bow Frame is a platform used to perform less complex spine surgeries. The Bow Frame is more versatile than the existing Wilson™ Frame, as the single device attaches to standard OR tables, Allen Advance Table, Allen Flex Frame, and the Mizuho OSI Modular Table System\*.

Its shape creates the desired reverse lordosis needed to open the intervertebral spaces. The Bow Frame enables the patient's abdomen to hang free during procedures. It is also radiolucent and allows for unrestricted C-arm access. The removable crank is used to adjust the amount of flex and tension in the patient supports. Every Bow Frame comes with a storage cart. Ideal for use with Laminectomy, Microdisc procedures, Disc procedures, Fusion procedures, Decompressions, and Foraminotomy.

- Fits OR tables
- Radiolucent
- Device weight: 25 lbs (11.3 kg)
- Patient supports are adjustable to fit patients of various sizes
- Patient supports adjust laterally up to 10" (25.4 cm) to relieve pressure on the patient's abdomen
- Patient weight capacity: 500 lbs (227 kg)
- Lightweight for easy set-up
- Compact for easy storage
- Storage cart included for easy transport
- Skin Care Cover disposables are comprised of cosmetic foam

Easy To Set-Up

Works With Standard Wingsets

Proven Pressure Management

# Allen® 4-Post System #A-71201, #A-71200

## Versatile And Easy To Use: Set Up On Your OR Table Within Minutes

The Allen 4-Post System is a lightweight, versatile platform that attaches to an OR table via short or long attachment straps and allows the surgeon to place patients in a prone or lateral spine position. Lordosis, kyphosis and a neutral position of the lumbar spine is now achievable without the use of a large and expensive specialty platform. The 4-Post System is designed to allow the patient's abdomen to hang freely, which may help reduce vena caval pressure. This also offers the ability to place an x-ray plate under the patient and provides unrestricted C-Arm access.

Ideal for use with Laminectomies, Discectomies, Osteotomies, Fusions, and other prone and lateral procedures.

- Fits operating tables
- Radiolucent
- Weighs under 10 lbs (4.5 kg) without the Wingsets
- Patient weight capacity: 500 lbs (227 kg)
- Skin Care Cover disposables made of cosmetic foam
- Compact for storage
- Lightweight and easy to set-up
- Easy to adjust for different size patients

Just Squeeze And Position

Anterior Access

Kyphotic Patients

# Precision Adjustments

# C-Flex® Head Positioning System #A-70700

## Makes Head Adjustments Easy... Just Squeeze And Position

The modular system can be used to position the head during spine surgery. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs, and lateral procedures.

- Cervical flexion / extension
- Lumbar positioning
- Adjust vertically for kyphotic patients
- Lateral positioning
- Device weight: 20 lbs (9 kg)
- 6" (15 cm) lateral adjustment range
- 28" (71 cm) height adjustment range
- 9" (23 cm) extension adjustment range
- +/- 15° lateral tilt
- Works with Standard and Radiolucent Skull Clamps and Headrest Systems from DORO™ and Mayfield®\*
- Includes fold-away mirror
- Easy airway access
- Fits the Allen® Advance Table
- Fits the Allen Flex Frame
- Fits the Mizuho OSI Modular Table System\*\*
- Patient weight capacity: 500 lbs (227 kg)

# C-Flex® AP-Vantage System #A-70110, #A-70111

## Advanced Table Imaging Capabilities For Your OR Table

The unique product design eliminates obstructions, leaving nothing but the patient in the shot. C-Flex AP-Vantage System provides for high quality cervical images on an OR table.

The system can be used for both anterior and posterior cervical surgeries; it includes an OR table adaptor (with carbon fiber rails) and the C-Flex head positioning system. All the benefits of the C-Flex system for the OR table with a variety of different head attachments.

Ideal for use with Odontoid Screws, Cervical Fusion, and Artificial Cervical Discs.

- Artifact-Free Imaging
- Works with Standard and Radiolucent Skull Clamps and Horseshoe Headrest from DORO™ and Mayfield®
- Patient Weight Capacity: 500 lbs (227 kg)
