

# Secure sealing and versatility in the palm of your hand

## Do more with ENSEAL® G2 Articulating Tissue Sealers

### Unmatched maneuvering for better access

- Facilitates a perpendicular approach to vessels and greater access to tissue in deep or tight spaces\*
- Vessels sealed with a perpendicular approach using ENSEAL® G2 Articulating Tissue Sealers were shown to be 51% stronger than vessels sealed at a 45° angle†
- May reduce the number of instrument exchanges between ports and the number of ports needed
- Less bleeding compared with LigaSure™ 5mm Blunt Tip§

### ENSEAL® G2 Articulating Curved

Code	Shaft diameter	Shaft length	Qty
NSLG2C35A	5mm	35cm	6
NSLG2C45A	5mm	45cm	6

### ENSEAL® G2 Articulating Straight

Code	Shaft diameter	Shaft length	Qty
NSLG2S35A	5mm	35cm	6
NSLG2S45A	5mm	45cm	6

All ENSEAL® and HARMONIC® devices are compatible with the Ethicon Endo-Surgery Generator.

The first 5mm articulating tissue sealer on the market

\*Compared to a non-articulating device.

†ENSEAL® devices tested in a benchtop study on 5-7mm porcine carotid arteries. With NSLG2C35A devices, median burst pressures were 51% higher for vessels sealed at a 90° angle compared to vessels sealed at a 45° angle (p=0.0007). With NSLG2S35A devices, mean burst pressures were 29% higher for vessels sealed at a 90° angle compared to vessels sealed at a 45° angle (p=0.001).

‡Data on file at Ethicon EndoSurgery, Inc. Studies conducted on porcine mesentery.

§In a preclinical laparoscopic porcine model, ENSEAL G2 Articulating Straight and Curved had significantly more hemostatic activations than LigaSure™ 5 mm Blunt Tip (LF1537) (P<0.001).

Enseal®

# Secure sealing and more versatility at every turn.

Do more with ENSEAL® G2 Articulating Tissue Sealers

# Secure sealing

driven by articulation

## Unparalleled approach to secure sealing

- Facilitates a perpendicular approach to vessels and greater access to tissue in deep or tight spaces\*
  - Vessels sealed with a perpendicular approach using ENSEAL® G2 Articulating Tissue Sealers were shown to be 51% stronger than vessels sealed at a 45° angle†
- Consistently seals up to 7mm vessels and lymphatics through high uniform compression‡
- Less bleeding compared with LigaSure™ 5mm Blunt Tip§

Articulation hand control is designed to lock in the desired angle of approach

Full 360° rotation

Compatible with 5mm trocars

110° of articulation

Ergonomic closing handle offers fit and comfort for each unique hand

# Versatility

driven by unique bottom-jaw technology

## Independent action of bottom jaw

The bottom jaw of ENSEAL® G2 Articulating Tissue Sealers is designed to deliver energy to tissue even with the jaws open, enabling spot coagulation, enhancing dissection and creating otomies.

## Unprecedented access

Provides access to tissue in deep or tight spaces and the ability to maneuver around corners and behind structures.

With this degree of versatility, it is possible to reduce the number of ports and instrument exchanges needed to achieve an optimal approach

Seal securely

Create otomies

Enable spot coagulation
