

WHY WAIT for test results?

FRENDS™ System

FAST

EASY TO USE

ACCURATE

tPSA

Rapid quantitative assay
for total Prostate Specific Antigen

- Improve patient care
- Increase patient satisfaction
- Increase practice efficiency
- Increase practice profitability

FREND™ System

Accurate, automated testing procedure – simple 3-step operation
No need to batch your sample – run when you are ready

- Controls: Minimum once a month two level liquid controls
- Electronic code chip calibration – no need to run liquid
- Daily electronic system QC control – takes only 1.5 minutes
- Stores 500 Test results

Test procedure

FREND™ PSA Plus

Specification

| | |
|------------------------------|-----------------|
| Analytical measurement range | 0.1 ~ 25 ng/mL |
| Sample type | Plasma or Serum |
| Sample volume | 30 µL |
| Limit of detection | 0.1 ng/mL |
| Reaction time | Max 4 min. |
| 1 Box | 25 tests |
| Storage condition | 35 °F~46 °F |

* The specifications are subject to change without prior notice.

Correlation graph

The R^2 correlation value of FREND™ PSA plus is more than 0.96 against laboratory results.
