

DRE Integra SP VSO2

Portable Anesthesia Machine

The Gold Standard in Portable Anesthesia

The DRE Integra SP VSO2 is a fully-functional, compact and portable anesthesia system in a lightweight package. The Integra SP VSO2 anesthesia system is compact enough for the smallest surgery or imaging suite, and is fully portable.

Easily transport the DRE Integra SP VSO2 by using the retractable handle, located conveniently on top of the unit. Side-located gas ports allow clinicians to safely and efficiently set up the machine.

In keeping with DRE's commitment to quality, all Integra SP anesthesia systems include a two-year manufacturer's warranty. The DRE Integra SP VSO2 is available with a hardshell carrying case, complete with casters and a retractable handle. A convenient mobile trolley with a sturdy built-in shelf is also available.

Features

- ✓ Small and compact unit ideal for office-based anesthesia
- ✓ Lightweight machine weighs only 26 pounds!
- ✓ Three gas machine (O2, N2O and Air)
- ✓ Mechanical anti-hypoxic device and air/N2O interlock
- ✓ **New for 2016!** Retractable top handle for easy transport
- ✓ **New for 2016!** Conveniently located side gas ports
- ✓ Many ventilator options available.
- ✓ Selectatec®- compatible vaporizer mounting system
- ✓ Optional carrying case with retractable handle and casters
- ✓ Optional mobile trolley with shelf
- ✓ Holds 1 vaporizer
- ✓ Specifically designed to accommodate low flow
- ✓ Auxiliary O2 flowmeter port
- ✓ Recessed flush valve
- ✓ Also available with MRI-compatible Penlon Nuffield Ventilator

SPECIFICATIONS

Weight (without vaporizer):
28 lbs (12kg)

Height: 13.8" (35cm)

Width: 19.7" (50cm)

Depth: 7.9" (20cm)

Flow Range:
Oxygen / Air / Nitrous Oxide:
0 - 10 L/min

Flowmeter Accuracy:
± 2.5% full scale reading

Flowmeter Construction and Dimensions:

Tubes and floats are matched, and must not be interchanged. Flowmeter tubes have antistatic coatings

Oxygen Failure Warnings:

Gas system whistle and a visual indicator (direct pressure operated)

Oxygen Flush Button:

The system supplies 35 - 75 L/min when the button is fully pressed

Minimum Oxygen Concentration:

30% ± 3%
(total O2 + N2O flow)

Basal Flow - Oxygen:

100 - 200 mL/min

*Available with
an optional
absorber*

*Also available
with a durable
mobile car*

*Also available with
a hard-shell carrying
case, making the
system easier to
transport*

SPECIFICATIONS

**Operating Atmospheric
Pressure Range:**
28 lbs (12kg)

Operating Temperature:
50 to 100°F (+10 to 38°C)

**Transport / Storage
Temperature:**
23 to 104°F (-5 to 40°C)

Operating Altitude:
8000ft (2438m) maximum

Operating Humidity:
10 - 85% R.H. non-condensing

Cleaning:
Wipe external surfaces with
dry or damp cloth. Use mild
soap, or disinfectant solution if
necessary.
