

# Excele®

## Antiseptic Skin Cleanser 4% Chlorhexidine Gluconate Solution

*4% chlorhexidine gluconate -  
the gold standard for  
surgical hand hygiene.*

Excele 4% chlorhexidine gluconate solution is an effective, rapid antimicrobial skin cleanser, comparable in features and active ingredient to Hibiclens®.

### Effective Broad Spectrum Antiseptic Agent:

- 4% chlorhexidine gluconate actives.
- Sustains antimicrobial action for up to 6 hours.
- Unique persistence of action not found with alcohol or iodine hand cleansers.
- Effective in the presence of blood and other soils.

### Meets CDC Requirements for All Levels of Hand Hygiene:

- Surgical hand scrub.
- Routine hand wash.
- Essential cleanser when hands are visibly soiled.

### Special Features:

- Binds to skin proteins for persistence of action.
- Mild formula and adjusted pH compatible with skin chemistry.

### Complete System Kit Available:

- Includes (2) 1 gallon bottles of Excele Antiseptic Skin Cleanser, (4) 16 oz. empty foaming dispensers and a handy funnel for refills.

# Excelle®

## Antiseptic Skin Cleanser 4% Chlorhexidine Gluconate Solution

### Description:

Excelle is a fast-acting antiseptic skin cleanser with antimicrobial action against a broad spectrum of pathogens including *Pseudomonas aeruginosa* and *staphylococcus aureus*.

### Intended Use:

Excelle is indicated for use as a routine hand wash, a surgical scrub, or as a preoperative patient skin cleanser.

### Product Specifications:

Active Ingredient: 4% chlorhexidine gluconate.  
Solution Color: Golden yellow.  
Odor: Mild antiseptic.

### Features:

- Excelle contains mild non-alkaline cleansers and the adjusted pH is compatible with skin chemistry.
- 4% chlorhexidine gluconate is fast acting and long lasting. The residual antimicrobial action persists for 6 hours and reduces risk of cross-contamination.
- Excelle maintains antimicrobial action in the presence of blood and other soils.
- The foamer dispensing bottle meets CDC requirements for soap bottles that are easily washed out prior to refill.

### Benefits:

- Excelle is the ideal product for hand hygiene at the beginning and end of the work day and especially if hands are visibly soiled.
- The same hand wash product may be used for routine hand wash and for surgical hand scrub.
- Provides antimicrobial protection if a glove failure exposes clinician to blood or other body fluids.
- Excelle is recommended in facilities at risk of Norovirus or *Clostridium difficile* outbreaks. The CDC does NOT recommend alcohol hand rubs in this situation.
- The foamer bottle dispenses Excelle in a light foam that makes thorough hand washing quick and easy.

### Precautions:

- Chlorhexidine gluconate may react with chlorine containing laundry products producing a permanent brown stain on linens and lab jackets. Pre-rinse laundry thoroughly with water before using detergents.
