ProHy21[®] BEDPAN Kit

Tender description

Preassembled kit containing Hygienic Covers and Hy21 bedpan supports

Hygienic Cover :

- Absorption : 600 ml
- No expiry date

Supports :

- Bedpan washer compatible
- Recyclable

Eco-friendly product

Made in Canada 

Product code

Case code: KT-PRO-HY21-B00

Présentation

This kit is designed for efficient management of bodily fluids. Our system has been proven to reduce the spread of pathogens that can lead to cross-contamination and nosocomial infections. It includes 200 hygienic covers[®] – bedpan bags (10 boxes of 20) containing a super absorbent pad, 10 white Hy21[®] bedpan supports and 2 white adaptors for bariatric patient.

Dimensions

Cover: Length = 24.5" (62.2cm). Width = 18" (45.7cm). Thickness = 38µm.

Support: Length = 15.5" – (38.5cm). Width = 11.75" - (29.6cm). Height = 4" – (10.6cm).

Composition

Polypropylene bedpan support. Polyethylene bag equipped with ties. Super absorbent pad 100% recycled composed of a non-woven support with a sulfate base coupled with sodium acrylate based co-polymers. Packaging made of recycled materials. No latex and no phthalates.

Shelf life

No expiry date.

Efficiency

Hygienic Cover: absorption of 600 ml of liquids in less than 30 seconds.

Support: weight resistance = 300 lbs (136 kg) or 500 lbs (227 kg) with adaptor.

Manufacturing process

Bedpan support: injection moulding. Cover: Heat welding with insertion of sliding ties.

Use

Hospital use. Particularly recommended for isolation case.

Instructions for use

Refer to the tutorial for more detail.

Precautions for use

Bedpan support: single-patient use. It is recommended to discard the bedpan support after the patient's departure. This recommendation is essential in the case of an infectious patient.

Hygienic Cover: single-use. Discard after use. Keep away from children.

Cleaning / Sterilization

The bedpan support and adaptor must be regularly cleaned and when soiled. It is recommended to use a disinfectant detergent or an enzyme product associated with a mechanical rubbing action. Follow the instructions on disinfectants to maximize their efficiency (dilution, contact time ...). It can also be cleaned in a bedpan washer without exceeding the temperature of 203°F or 95°C.

Disposal

Dispose of product in regular waste or according to the protocol of the institution. Don't dispose the bag or the pad in toilet. The support is recyclable (Plastic #5 - PP).

Benefits

Increases hygiene, saves time, reduces odours, simple and risk-free disposal. The kit is a patented product with hole-shaped handles. Limits the spread of pathogens.

Identification

Each product is identified with a lot number.

Quality

Our bags are tested using the methodology and acceptance criteria of standard NF-X30-501: *Packaging for medicinal care waste – Bags for soft infections risk-generating waste – Specifications and tests methods.*

Regulatory

FDA: class I medical device exempt from 501(k).

CE marking: Class I medical device according to the rules of annex IX of European Council Directive 93/42/EEC.

Risks / Safety

Slight risk of ocular or respiratory irritation in case of extended contact with the super absorbent pad. Safety data sheet is available upon request.

Handling/Storage

Store in a clean and dry place, away from sun.
