

Hy21® Elongated Urinal Support

An effective solution to biological waste management and containment

A solution to Healthcare-Acquired Infections (HAIs)

- The hy21® Elongated Urinal Support helps to effectively manage and contain urine at point of care; it also ensures that health care providers adopt the best method to reduce the number of steps required to handle urinals, thereby reducing the spread of pathogens which may lead to contamination and HAIs.
- When used with Hygie Hygienic Covers® Urinal Bag, creates the perfect solution to contain potentially harmful pathogens and further promote safe, reliable practices in healthcare. It's unique super-absorbent pad is designed to turn liquid wastes into a gel within seconds.
- The ergonomic design offers efficient support and helps prevent spills and splashes.
