

LIQUIBAND[®] Exceed[™]
2-Octyl Cyanoacrylate Skin Adhesive

Ambient storage

Microbial barrier

Secure

Water Resistant

Draws the Line
for an Even & Consistent
Wound Closure and Coverage

Advanced Medical Solutions

A new member of **LIQUIBAND®** family of products containing same attributes of precision and controlled application

High Viscosity¹

Provides optimal flexibility, won't easily crack or break.

Controlled Expression of Adhesive²

Applicator offers discrete control over expression of adhesive.

Better Yield of Adhesive³

Better yield of adhesive for greater wound coverage, upto 30cm, making it more cost effective.

Microbial Barrier⁴

Acts as a barrier against Gram-positive, Gram-negative and even fungal microbes. Locks out *S. aureus*, *P. aeruginosa*, *E. coli*, *Candida albicans* and even MRSA.

Reliable Wound Closure and Sealing

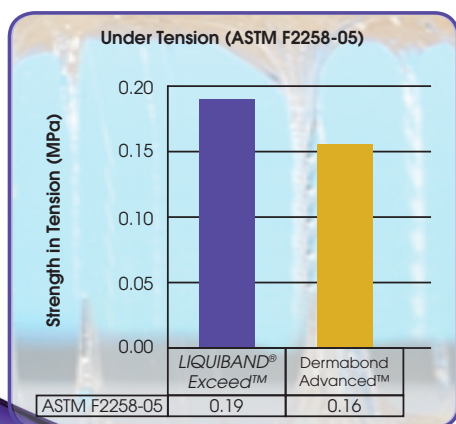

The adhesive will stay on skin for 5-10 days and slough off naturally.

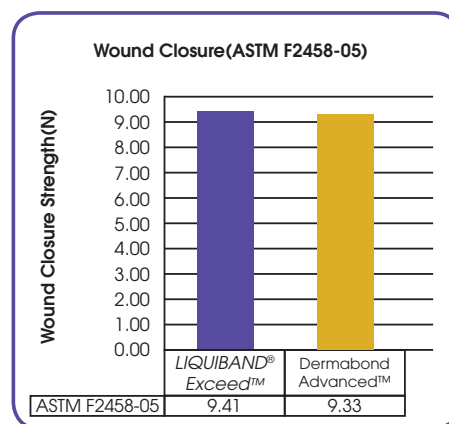

LIQUIBAND® Exceed™ is suitable for the topical closure of skin wounds which are a result of a variety of surgical procedures including:

- Nephrectomy
- Thyroidectomy
- Arthroplasty
- Colorectal resection
- Heart by pass (Organ Transplant)
- Hepatectomy (Organ Transplant)
- C Section
- Partial Mastectomy / Mastectomy

High Tensile Strength⁵

Strong Wound Closure⁶

n = 12 in all tests
